

Dear Parents,

Transporting students safely to school is essential and we are happy to offer daily bus service to school families that is safe, convenient, and flexible without charging transportation fees.

As you know, weather can sometimes present special challenges. There also are times when unusual events occur, such as mechanical breakdown or driver illness, that make it necessary for us to create special contingency plans.

The Alternate Route Contingency Plan (ARCP) described on the following page may be utilized in the event of inclement weather, mechanical emergency, or other special situations. The ARCP is designed for each bus route to have a designated “hub” that is on a primary road where students can meet the bus and travel safely to school. The ARCP can be used for morning pick-ups and/or afternoon drop-offs, depending on the need.

Please note these plans are NOT meant to replace our regular service; they will be used ONLY in special situations. When the plan is used, you will receive an instant alert notification from the school.

In selecting alternate locations, we have made every effort to identify places that are centrally located and easily accessible for parents in those areas. We have worked with local authorities (and merchants) to ensure that our families will be allowed to gather at the location in order to meet the bus. In the event of inclement weather, please remember that decisions regarding the safe transportation of your children to school are ultimately yours to make. If you do not feel safe transporting your student(s) to and from the “hub” location, then Kenston Forest School will recognize the absence as excused and will offer full academic support.

Thank you for your support as we work together to make your child’s bus ride to and from school both safe and pleasant.

Lori Bacon

Head of School
